URBAN DAY GRAMMER SCHOOL

- Higher School Certificate (HSC)

SQI COLLEGE OF ICT

- Certificate in Software Engineering & Website Development

SKILLS

- JavaScript
- React
- Node.js
- Express.js
- MongoDB
- HTML
- CSS

LANGUAGES

- English: Fluent

WORK EXPERIENCE

KoloPocket — Fintech Web Application

Building a full-stack MERN fintech application that digitalizes Nigeria's informal rotating savings groups (Ajo/Alajo). Developed backend transaction and payout controllers (Contribution, Commission, Receipt) that handle sending and receiving money entirely within the platform. Implemented JWT authentication and a responsive React (Vite) frontend, deployed on Render.

Catering Services

Developed a catering website using JavaScript, featuring an integrated WhatsApp booking function for streamlined customer communication and service reservations.

Quest Code Institute — School Management Portal

Created a school management portal with distinct interfaces for teachers and students, including an administrative dashboard for comprehensive monitoring, adding, and management of user information.

CardPro — AI Business Card Generator

Building a full-stack React application that uses AI to help users design and generate custom digital business cards. Implemented a multi-step flow with React Router (template selection → details form → card preview/download), AI-assisted template/content generation, dynamic theme coloring across templates, and live logo upload with instant preview. Used lifted state management to pass user data across routes and render it live into the selected design.
