## PROFILE SUMMARY

Highly motivated Full-Stack Developer with 1 year of practical experience. Proficient in JavaScript, React, Node.js, Express, and MongoDB. Skilled in problem-solving and independent work, with proven experience in developing diverse projects and deploying with Vercel, Render, and GitHub.

## EDUCATION

### URBAN DAY GRAMMER SCHOOL

- Higher School Certificate (HSC)

### SQI COLLEGE OF ICT

- Certificate in Software Engineering & Website Development

## SKILLS

- JavaScript
- React
- Node.js
- Express.js
- MongoDB
- HTML
- CSS

## LANGUAGES

- English: Fluent

## WORK EXPERIENCE

### KoloPocket — Fintech Web Application

2026 - PRESENT

Building a full-stack MERN fintech application that digitalizes Nigeria's informal rotating savings groups (Ajo/Alajo). Developed backend transaction and payout controllers (Contribution, Commission, Receipt) that handle sending and receiving money entirely within the platform. Implemented JWT authentication and a responsive React (Vite) frontend, deployed on Render.

### Catering Services

2025 - PRESENT

Catering Website: Developed a catering website using JavaScript, featuring an integrated WhatsApp booking function for streamlined customer communication and service reservations.

### School Management Portal

2025 - PRESENT

School Management Portal: Created a school management portal with distinct interfaces for teachers and students, including an administrative dashboard for comprehensive monitoring, adding, and management of user information.
